PRODUCT ADVANTAGES

Environmental protection, Safety and health

Does not contain formaldehyde, TVOC, heavy metals and substances of high concern. Non-toxic, odorless, and will not produce any harmful or irritating gas when exposed to the sun, safe and healthy to use

Weather and wear resistance

The high-resistance formula added to the raw materials has excellent resistance to UVA and UVB, not afraid of high temperature, extreme cold, rain and other weather. It is not easy to fade. Compared with traditional lawns, the wear resistance and pull resistance are greatly improved, and the service life is effectively extended

Intelligent production Quality assurance

It has internationally advanced full-line production equipment and has created a traceable quality management system to ensure the high quality of grass silk; high-simulation appearance, comparable to natural grass, skin-friendly and silky touchprotection rubber

QUALITY CONTROL

Tensile test

Pull out test

Anti-UV test

Anti-wear test

Flame retardant test

APPLICATIONS
